EnCana earns \$186 million and generates \$765 million of cash flow on a pro forma basis in the first quarter of 2002

Pro forma natural gas sales up 21 percent, exploration success continues, high-quality gas reserves addition in U.S. Rockies

Calgary, Alberta, (April 25, 2002) – EnCana Corporation (TSE & NYSE: ECA), created April 5, 2002 by the merger of Alberta Energy Company Ltd. (AEC) and PanCanadian Energy Corporation (PanCanadian), today reported \$186 million of earnings and \$765 million of cash flow on a pro forma basis during the first quarter of 2002.

All references to earnings, cash flow, production, sales, proceeds of asset sales and other information not specifically contained in the EnCana (formerly PanCanadian) and AEC Management's Discussion and Analysis and interim unaudited consolidated financial statements that are attached to this press release are presented on a pro forma basis as if the merger of PanCanadian and AEC had occurred effective January 1, 2002.

Strong pro forma operating results

Oil and gas sales increased by 12 percent to 700,846 barrels of oil equivalent per day in the first quarter of 2002, compared to the first quarter of 2001. Natural gas sales averaged 2.7 billion cubic feet per day, up 21 percent over the same period in 2001. Oil and natural gas liquids sales averaged 246,846 barrels per day, down approximately 1 percent. Operating and general and administrative costs averaged \$4.61 per barrel of oil equivalent in the quarter.

"These strong operating results are a testament to the employees of EnCana who, throughout the demanding merger process, remained focussed on their jobs, enabling the Company to grow production and maintain cost control," said Gwyn Morgan, EnCana's President & Chief Executive Officer. "In the quarter, we were also able to advance a number of important growth initiatives: a significant discovery at our Tahiti prospect in the deepwater Gulf of Mexico, promising appraisal wells at the Buzzard discovery in the U.K. central North Sea, filing of the regulatory applications for development of the Deep Panuke gas field off Nova Scotia, continued development success at the Ladyfern field in northeast British Columbia and Canada's first reported sales of coalbed methane production. Adding to this outstanding internal progress, we made a timely acquisition that will strengthen our position in one of our key growth platforms – the U.S. Rockies. Last week, we announced a proposed acquisition of approximately 500 billion cubic feet of long life, natural gas equivalent reserves in northwest Colorado," Morgan said.

"The EnCana team used every one of the sixty-eight days that it took to complete the merger to get EnCana ready to hit the ground running. The key integration decisions have already been made and our new teams are working together. Our production numbers are on target and we're making progress towards achieving our targeted annual synergies of one-quarter billion dollars in operating and general and administrative expenses and one-quarter billion dollars in capital investment," Morgan said.

ENCANA

Pro forma financial results impacted by price declines

Lower commodity prices, particularly natural gas prices, impacted first quarter financial results. The average industry natural gas price at AECO for the first quarter of 2002 was \$3.49 per thousand cubic feet, compared to \$11.37 per thousand cubic feet in the same period a year earlier. The average West Texas Intermediate crude oil benchmark price was US\$21.64 per barrel, down 25 percent from the same quarter in 2001. Heavy oil differentials improved as a result of lower industry heavy oil production levels and an improved Gulf Coast heavy oil market. Since the end of 2001, oil and gas prices have strengthened due to indications of an improving North American economy, OPEC restraint and political factors such as tensions in the Middle East.

For the three months ended March 31, 2002, EnCana's pro forma highlights include:

- Net income of \$186 million; net income attributable to common shareholders of \$175 million, or \$0.36 per common share diluted;
- Cash flow of \$765 million, or \$1.58 per common share diluted;
- Natural gas sales of 2,724 million cubic feet per day, up 21 percent from the first quarter of 2001, with the average realized price declining 64 percent to \$3.31 per thousand cubic feet;
- Crude oil and natural gas liquids sales of 246,846 barrels per day, down 1 percent from the first quarter of 2001, with the average realized price declining 10 percent to \$25.37 per barrel;
- Capital investment, net of proceeds on asset sales, of \$1,306 million; and
- A strong financial position with debt to capitalization of 39 percent (preferred securities included as debt).

"During the first quarter, every one of our six growth platforms, from Western Canada to the U.K. North Sea, either achieved strong production growth or completed important objectives towards the development of long-term, high-impact growth initiatives. By 2005, EnCana is targeting production growth of about 55 percent to more than 1.1 million barrels of oil equivalent per day," Morgan said. "EnCana possesses the scope, scale and reach, plus the financial strength, to deliver enhanced value for shareholders, and our teams are focussed on doing just that."

Important Notice: Readers are cautioned that these pro forma results may not reflect all adjustments and reconciliations that may be required under Canadian generally accepted accounting principles. These pro forma results may not be indicative of the results that actually would have occurred or of the results that may be obtained in the future.

EnCana corporate developments**EnCana Corporation created in less than 10 weeks**

In separate meetings on April 4, 2002, AEC common shareholders and optionholders and PanCanadian common shareholders voted strongly in favour of the merger – 91 percent and 81 percent, respectively, of the votes cast. At the PanCanadian meeting, 84 percent of the PanCanadian common shareholders voting cast votes in favour of the name change to EnCana Corporation. On April 5, the morning after the meetings, the Court of Queen's Bench of Alberta approved the transaction and the historic merger was completed later that day, 68 days after the two companies announced their intention to merge.

EnCana's transition teams have made considerable progress in integrating the two companies. The new organizational structure, staffing decisions and assignments have largely been implemented.

Dividends

PanCanadian common shareholders of record as of March 15, 2002 were paid a quarterly dividend of 10 cents per share on March 29, 2002. Recognizing that AEC's annual dividend of 60 cents per share would normally be payable in June, after the expected completion of the merger, AEC's Board of Directors declared a dividend of 45 cents per share which was paid on March 28, 2002 to AEC common shareholders of record as of March 7, 2002.

The Board of Directors of EnCana has declared a quarterly dividend of ten cents (10 cents) per share payable on June 28, 2002 to common shareholders of record as of June 14, 2002.

Energy Services

As part of EnCana's strategic review of its operations, the Company has decided to exit its Houston-based merchant energy operations which are included in the Company's Midstream and Marketing segment of its business. Various exit alternatives are being evaluated with a view to maximizing the value to EnCana. As a result of this strategic decision, the Houston-based merchant energy operations are being accounted for as discontinued operations in the Company's interim financial statements. The Company will honour all existing contracts and commitments to the Company's customers.

Unrelated to the decision to discontinue its Houston-based merchant energy operations, the Company has also determined, in respect of certain sales and purchases of natural gas in its U.S. marketing subsidiary recorded in 2001, that it is appropriate to treat revenue and expenses in respect of those contracts on a "net" basis, rather than on a gross basis as Revenue and Expenses-Direct. This treatment has no effect on the previously reported net income or cash flow of the Company and its balance sheet remains unchanged.

For further details on both of these developments, see Note 3 of the EnCana interim unaudited consolidated financial statements for the period ended March 31, 2002.

EnCana operational highlights**Onshore North America****Strong organic growth in natural gas**

EnCana's sales of produced natural gas in North America during the first quarter, which includes the impact of 161 million cubic feet per day of gas withdrawals from storage, increased to 2,713 million cubic feet per day, up 21 percent on a pro forma basis over the same period last year. The increase in sales came primarily from the U.S. Rockies and the Ladyfern and Greater Sierra regions of northeast British Columbia. The Onshore North America division drilled more than 1,000 net wells during the first quarter.

High-quality natural gas assets addition in the U.S. Rockies

On April 17, EnCana announced that its U.S. subsidiaries had entered into an acquisition agreement, for approximately C\$461 million (US\$292 million), which expands production, reserves and land holdings in the U.S. Rockies. The Company has agreed to purchase approximately 500 billion cubic feet of long-life natural gas and associated natural gas liquids reserves and about 180,000 net acres of undeveloped land in the Piceance Basin of northwest Colorado. The acquisition also includes a gathering system and a gas plant. These properties are currently producing an average of 38 million cubic feet of gas equivalent per day. EnCana plans to drill about 50 wells on the acquired lands and increase daily production to about 55 million cubic feet of gas equivalent by the end of 2002. EnCana has achieved great success applying its tight gas development expertise to multi-zone formations of this nature and expects to triple production from these properties in the next three years. The transaction is subject to regulatory approvals and certain other conditions, and is expected to close at the end of May 2002.

Greater Sierra production rising

In the Greater Sierra area of northeast B.C., EnCana drilled 45 wells during its winter program. The Company expects daily production to average about 150 million cubic feet of gas this year. EnCana has clearly identified substantial growth from its extensive lands in the region and is forecasting production to more than double by 2005.

Ladyfern gas development

At the Ladyfern gas field, located in northeast British Columbia, the Company successfully drilled seven wells, including six development wells and one step out well. Current production from this area is approximately 140 million cubic feet per day. Results of two additional exploration wells are under evaluation.

EnCana's coalbed methane pilot projects both showing promise

In January 2002, the EnCana and MGV Energy Inc. joint venture, operating on the Palliser Block in southern Alberta, initiated the first significant coalbed methane gas sales reported in Canada. Six wells are producing at stable flow rates ranging from 30,000 to 250,000 cubic feet of natural gas per day per well. Long-term production tests are in progress to verify reserve estimates and stabilize production rates. Initial test results to date indicate that net recoverable reserves on the joint venture lands within the Palliser Block could be approximately one to two billion cubic feet of natural gas per section, with upside from a completion-optimization program now underway. The Company anticipates being in a position to make decisions regarding commercial development by mid 2002.

In southeastern B.C., EnCana continued testing and evaluating the coalbed methane potential in the Elk Valley. The first pilot project has had 10 wells on test, dewatering coals since late 2001, with encouraging results to date. A decision on advancing to an extended pilot project or commercial scale project is expected before year-end.

Oil and natural gas liquids production and sales rise

EnCana's sales of oil and natural gas liquids, which includes conventional crude oil, Syncrude production and natural gas liquids, averaged 195,183 barrels per day from the Onshore North America division. On a comparative basis, the average daily sales volume of liquids was up 5 percent from the first quarter of 2001.

SAGD production ramping up

First quarter daily production from the Foster Creek steam-assisted gravity drainage oil project averaged 11,100 barrels and is currently about 15,000 barrels per day. Production is expected to reach 20,000 barrels per day in the second quarter of 2002. EnCana's Christina Lake Phase 1 project is currently being commissioned. Steam injection will begin at Christina Lake in May 2002, with first production expected in the third quarter of 2002.

Weyburn production exceeds expectations

First quarter production averaged 13,200 barrels per day, up 22 percent from the first quarter of 2001. Incremental production from this Saskatchewan enhanced oil recovery project now amounts to approximately 2,900 barrels per day of the Weyburn Unit oil production. In early February, the first of two gas recycle compressors started re-injecting produced CO₂ gas into the reservoir.

Syncrude cost performance improves

EnCana's share of Syncrude production for the first quarter of 2002 averaged 31,548 barrels per day, down 2 percent from the same period last year due primarily to unplanned maintenance. Unit operating costs were down by \$2.75 per barrel, or 13 percent, to average \$17.73 per barrel in the first quarter of 2002. This was due largely to a reduction in natural gas prices in the past year.

Offshore & International Operations**Ecuador**

Oil production from Ecuador averaged 50,351 barrels per day in the first quarter of 2002, down 7 percent due primarily to reduction of the effective allowable on the SOTE pipeline in the quarter. Daily crude oil sales averaged 38,774 barrels, down from 51,512 barrels in the first quarter of 2001, due to the scheduling of tanker shipments leaving port. The first quarter production that remained in inventory at quarter end will be sold during the second quarter. Ecuador volumes are constrained by available pipeline transportation. EnCana plans to double its Ecuador production to 100,000 barrels per day in mid 2003 following completion of the OCP Pipeline, which is one-third complete.

East Coast of Canada – development of Deep Panuke advanced

In March 2002, regulatory applications were filed with the Canada-Nova Scotia Offshore Petroleum Board and the National Energy Board for development of the Company's \$1.1 billion Deep Panuke natural gas project off the coast of Nova Scotia. Regulatory hearings for the project are expected to begin in the fall of 2002, with a decision in the first quarter of 2003. EnCana will decide whether to proceed with construction of Deep Panuke facilities once regulatory approval is received. The project involves the production and processing of raw gas offshore, the transport of market-ready gas via sub-sea pipeline to Goldboro, Nova Scotia, and an interconnection with the Maritimes and Northeast Pipeline main transmission pipeline. Based on current assumptions, commercial production could begin in 2005. The project is estimated to recover reserves of natural gas approaching one trillion cubic feet over an expected 11-year production life of the field.

Offshore & New Ventures Exploration**Gulf of Mexico – promising discovery**

In early April 2002, EnCana and its partners announced a significant discovery at the Tahiti prospect located in Green Canyon Block 640, approximately 190 miles southwest of New Orleans in the deepwater Gulf of Mexico. The Tahiti No. 1 well is situated in approximately 4,000 feet of water and was drilled to a measured depth of 28,411 feet. Results from the exploratory well indicate the presence of high-quality reservoir sand with total net pay of more than 400 feet. EnCana has a 25-percent working interest with ChevronTexaco as the operator. Tahiti No. 1 is the second well in EnCana's four-well commitment to earn a 25-percent interest in 71 ChevronTexaco-operated blocks in the prolific Mississippi Fanfold Belt in the Gulf of Mexico. Completion of the four-well program is expected by early 2003.

U.K. North Sea – positive results from appraisal wells

In April 2002, EnCana reported the results of two appraisal wells, which verified the anticipated extensions of the Buzzard oil discovery, located in the U.K. central North Sea. Additional appraisal drilling is underway on Buzzard. Results from these two wells are expected in May.

Scotian Shelf deep water exploration

In the first quarter of 2002, the Company participated in the drilling of the Annapolis B-24 deepwater exploratory well, located 350 kilometres south of Halifax, Nova Scotia in 1,740 metres of water. Drilling of the well was suspended in late March due to a gas influx that occurred at an intermediate well depth of 3,500 metres. Following a detailed analysis of the event and the condition of the well bore, the participants plugged and abandoned the well for mechanical reasons. The participants have started to redrill the Annapolis prospect from a location that is about 500 metres northeast of the original wellbore.

Midstream and Marketing**Express Pipeline System**

During the first quarter, Express pipeline shipments increased 2 percent over the first quarter of 2001, averaging 155,600 barrels of oil per day to U.S. Rocky Mountain and Midwest markets. EnCana continues to evaluate expansion opportunities, which will be linked to market demand for shipping Canadian crude oil to the U.S.

Financial Strength

On a pro forma basis, EnCana possesses a strong financial position. The Company's debt-to-capitalization ratio was 39:61 (preferred securities included as debt). Total first quarter capital investment was \$1,345 million, excluding dispositions. Dispositions were \$39 million, bringing net capital investment to \$1,306 million. EnCana recently received its first long-term debt rating, following the merger, in Canada by Dominion Bond Rating Service. The rating of A(low) confirms EnCana's position as a strong investment grade issuer in the Canadian market.

CONFERENCE CALL TODAY

EnCana Corporation will host a conference call today, Thursday, April 25, 2002 starting at 11 a.m., Mountain Time (1 p.m. Eastern Time) to discuss EnCana's pro forma first quarter 2002 financial and operating results.

To participate in this call, please dial 416-640-1907 approximately 10 minutes prior to the conference call. An archived recording of the call will be available from about midnight April 25, 2002 until May 2, 2002 by dialling 416-640-1917 and entering pass code 184780#.

A live audio Web cast of the conference call also will be available at EnCana's Web site, www.encana.com, under Investor Relations.

EnCana is the largest North American based independent oil and gas company with an enterprise value of approximately C\$30 billion. It is North America's largest independent natural gas producer and gas storage operator. Ninety percent of the Company's assets are in four key North American growth platforms: Western Canada, offshore Canada's East Coast, the U.S. Rocky Mountains and the Gulf of Mexico. EnCana is the largest producer and landholder in Western Canada and is a key player in Canada's emerging offshore East Coast basins. In the U.S., EnCana is one of the largest gas explorers and producers in the Rocky Mountain states and has a strong position in the deepwater Gulf of Mexico. The Company has two key high-potential international growth platforms: Ecuador, where EnCana is the largest private sector oil producer, and the U.K. central North Sea, where EnCana is the operator of a very large oil discovery. The Company also conducts high upside potential New Ventures exploration in other parts of the world. EnCana is driven to be the industry's best-of-class benchmark in production cost, per-share growth and value creation for shareholders. EnCana common shares trade on the Toronto and New York stock exchanges under the symbol ECA.

ADVISORY – In the interests of providing EnCana shareholders and potential investors with information regarding EnCana, including management's assessment of EnCana's future plans and operations, certain statements contained in this news release are forward-looking statements within the meaning of the "safe harbour" provisions of the United States Private Securities Litigation Reform Act of 1995. Forward-looking statements in this news release include, but are not limited to, EnCana's internal projections, expectations or beliefs concerning future operating results, and various components thereof, future economic performance, the production and growth potential of its various assets, including the assets being acquired under the proposed acquisition of assets in the U.S. Rockies; the anticipated date by which EnCana will have exited its Houston-based merchant energy operations; projected increases in daily production of oil, natural gas and natural gas liquids to 2005; plans to drill additional wells to increase production; potential exploration, the anticipated closing date of the proposed transaction to acquire the assets in the U.S. Rockies that are described in this press release, the potential success of certain projects such as the coalbed methane projects and the other exploratory wells in the Gulf of Mexico and the North Sea.

Readers are cautioned not to place undue reliance on forward-looking statements, as there can be no assurance that the plans, intentions or expectations upon which they are based will occur. By their nature, forward-looking statements involve numerous assumptions, known and unknown risks and uncertainties, both general and specific, that contribute to the possibility that the predictions, forecasts, projections and other forward-looking statements will not occur, which may cause the Company's actual performance and financial results in future periods to differ materially from any estimates or projections of future performance or results expressed or implied by such forward-looking statements. These risks and uncertainties include, among other things: volatility of oil and gas prices; fluctuations in currency and interest rates; product supply and demand; market competition; risks

inherent in the Company's marketing operations; imprecision of reserve estimates; the Company's ability to replace and expand oil and gas reserves; its ability to generate sufficient cash flow from operations to meet its current and future obligations; its ability to access external sources of debt and equity capital; the risk that the businesses of AEC and PanCanadian will not be successfully integrated and that the anticipated synergies will not be realized; costs relating to the merger of AEC and PanCanadian being higher than anticipated and other risks and uncertainties described from time to time in the reports and filings made with securities regulatory authorities by EnCana and its indirect wholly-owned subsidiary, AEC. Although EnCana believes that the expectations represented by such forward-looking statements are reasonable, there can be no assurance that such expectations will prove to be correct. Readers are cautioned that the foregoing list of important factors is not exhaustive. Furthermore, the forward-looking statements contained in this news release are made as of the date of this news release, and EnCana does not undertake any obligation to update publicly or to revise any of the included forward-looking statements, whether as a result of new information, future events or otherwise. The forward-looking statements contained in this news release are expressly qualified by this cautionary statement.

Notes to Pro Forma Consolidated Financial Statements
March 31, 2002
(Unaudited)

Attachment I (con't)

1. Basis of Presentation

These unaudited Pro Forma Consolidated Financial Statements have been prepared for information purposes and are prepared on a basis consistent with the Pro Forma Consolidated Financial Statements included in the Joint Information Circular concerning the merger of Alberta Energy Company Ltd. (AEC) and PanCanadian Energy Corporation (PanCanadian). All pro forma adjustments related to the preliminary purchase price allocation have been based upon the estimated fair values determined in preparing the December 31, 2001 Pro Forma Consolidated Financial Statements with no update to March 31, 2002. All pro forma adjustments are consistent with the adjustments made to the December 31, 2001 Pro Forma Consolidated Financial Statements, unless no longer applicable.

These unaudited Pro Forma Consolidated Financial Statements have been prepared from:

- (a) PanCanadian's unaudited consolidated financial statements for the three months ended March 31, 2002.
- (b) AEC's unaudited consolidated financial statements for the three months ended March 31, 2002.

The unaudited Pro Forma Consolidated Balance Sheet gives effect to the transaction described in Note 4 as if it had occurred on March 31, 2002. The unaudited Pro Forma Consolidated Statements of Earnings and Cash Flow from Operations give effect to the transaction as if it occurred on January 1, 2002.

These unaudited Pro Forma Consolidated Financial Statements may not be indicative of the results that actually would have occurred if the events reflected therein had been in effect on the dates indicated or the results that may be obtained in the future.

These unaudited Pro Forma Consolidated Financial Statements should be read in conjunction with the consolidated financial statements of PanCanadian and AEC.

2. Principles of Consolidation

These unaudited Pro Forma Consolidated Financial Statements have been prepared on the basis that PanCanadian will account for the transaction as a purchase of AEC using the purchase method of accounting. Accordingly, the assets and liabilities of AEC will be recorded at their estimated fair value.

In completing the transaction, PanCanadian will issue 1.472 Common Shares for each issued and outstanding Common Share of AEC.

EnCana Corporation
(formerly PanCanadian Energy Corporation)
Notes to Pro Forma Consolidated Financial Statements
March 31, 2002
(Unaudited)

3. Pro Forma Accounting and Presentation Adjustments and Assumptions

PanCanadian and AEC prepare their consolidated financial statements using similar accounting policies and presentation with the exception of the items noted below. The following accounting policy and financial statement presentation adjustments have been made to match PanCanadian and AEC.

(a) Mark-to-Market Accounting for Midstream and Marketing Activities.

PanCanadian accounts for its Midstream and Marketing activities using mark-to-market accounting. Certain of AEC's activities related to Midstream and Marketing, specifically purchased gas marketing and gas storage optimization activities, have been restated to a mark-to-market basis of accounting.

(b) Financial Statement Presentation Adjustments

- (i) To be consistent with PanCanadian's presentation, revenues associated with AEC's purchased gas activity have been reclassified from Upstream revenue.
- (ii) To be consistent with AEC's presentation, PanCanadian's Transportation and selling expenses have been reclassified from Upstream and Midstream and Marketing revenues.
- (iii) To be consistent with AEC's presentation of expenses, PanCanadian's Operating expenses and Cost of product purchased have been reclassified from Direct expenses.
- (iv) To be consistent with AEC's presentation, PanCanadian's interest revenue has been reclassified from Other revenue
- (v) To be consistent with AEC's presentation, PanCanadian's net foreign exchange gain has been reclassified from Other revenue.

EnCana Corporation
(formerly PanCanadian Energy Corporation)
Notes to Pro Forma Consolidated Financial Statements
March 31, 2002
(Unaudited)

4. Pro Forma Acquisition Adjustments and Assumptions

- (a) The purchase of AEC for aggregate consideration of \$8,618 million comprising 218.4 million Common Shares of PanCanadian based on the exchange ratio of 1.472 PanCanadian Common Shares for each AEC Common Share. The estimated fair values are as at December 31, 2001 unless otherwise stated.

Calculation and preliminary allocation of purchase price:

	\$ Million
PanCanadian Common Shares issued to AEC shareholders (million)	218.4
Price of PanCanadian Common Shares (\$ per Common Share)	38.43
Value of PanCanadian Common Shares issued	\$ 8,391
Fair value of AEC Share Options exchanged for Share Options of EnCana Corporation	77
Transaction costs	<u>150</u>
Total Purchase Price	8,618
Plus: Fair value of liabilities assumed by PanCanadian	
Current liabilities	1,441
Long-term debt	4,351
Project financing debt	592
Preferred securities	423
Capital securities	486
Other non-current liabilities	193
Future income taxes	<u>2,922</u>
Total Purchase Price and Liabilities assumed	<u>\$ 19,026</u>
Fair value of assets acquired:	
Current assets	\$ 1,724
Capital assets	13,771
Other non-current assets	806
Goodwill	<u>2,725</u>
Total fair value of assets acquired	<u>\$ 19,026</u>

EnCana Corporation
(formerly PanCanadian Energy Corporation)
Notes to Pro Forma Consolidated Financial Statements
March 31, 2002
(Unaudited)

4. Pro Forma Acquisition Adjustments and Assumptions (continued)

- (b) The number of issued and outstanding AEC Common Shares on the date of the transaction has been assumed to be 148.3 million, taking into account common shares issued or purchased between December 31, 2001 and March 31, 2002. This assumes that none of the outstanding options to purchase AEC Common Shares at March 31, 2002 are exercised and converted to AEC Common Shares prior to the transaction.
- (c) The number of issued and outstanding options to purchase AEC Common Shares on the date of the transaction has been assumed to be 9.0 million, updated to take into account options exercised between December 31, 2001 and March 31, 2002. The fair value of these options has been included in the calculation of the purchase price. The fair value of these options was estimated at December 31, 2001 using the Black-Scholes option pricing model with the same assumptions as disclosed in Note 13 of the Notes to the AEC 2001 Consolidated Financial Statements. The fair value of these options was calculated to be \$77 million, adjusted to reflect options exercised to March 31, 2002.
- (d) The total purchase price includes the value of the PanCanadian Common Shares to be issued to the AEC shareholders plus the cash costs of completing the transaction. These costs, estimated to be \$150 million, include investment advisor fees, legal and accounting fees, printing and mailing costs and other transaction related costs. These costs have been added to accounts payable on the unaudited Pro Forma Consolidated Balance Sheet.
- (e) Included in AEC's Preferred Securities are \$430 million principal amount of Capital Securities which are convertible, at the option of the holder, into Common Shares of AEC. AEC also has the option to repay both interest and principal through the issuance of Common Shares. As a result, these securities are treated as equity for accounting purposes and distributions in respect of these securities, net of income tax, are charged directly to Retained Earnings. Immediately prior to the closing of the transaction, AEC supplemented the Trust Indenture covering these securities to remove AEC's option to pay interest and principal through the issuance of Common Shares. With the removal of this option, these securities are treated as long-term debt and distributions in respect of these securities are recorded as interest expense in the unaudited Pro Forma Consolidated Statement of Earnings.
- (f) Future income tax expense has been adjusted for the impact of the items noted above that affect current year net earnings.
- (g) No adjustment has been made to reflect operating synergies that may be realized as a result of the transaction.
- (h) The increase in the carrying value of Capital Assets relates to unproved properties and therefore no adjustment has been made to Depreciation, depletion and amortization.

EnCana Corporation
Notes to Pro Forma Consolidated Financial Statements
March 31, 2002
(Unaudited)

4. Pro Forma Acquisition Adjustments and Assumptions (continued)

The purchase price allocation is preliminary and may change as a result of several factors, including:

- changes in the fair values of AEC's assets and liabilities at the closing of the transaction;
- actual number of AEC Common Shares and options to acquire AEC Common Shares outstanding at the date of the closing;
- actual transaction costs incurred.

However, Management does not believe that the final purchase price allocation will differ materially from that presented in the unaudited Pro Forma Consolidated Financial Statements.

5. Goodwill

The preliminary purchase price allocation includes approximately \$2.7 billion of Goodwill. As required under Canadian generally accepted accounting principles, goodwill will not be amortized into income. However, goodwill will be subject to an annual impairment review and should there be an impairment, that amount would be charged to income.

As outlined in Note 4, the allocation of the purchase price presented is preliminary. The Company will finalize the purchase price allocation after closing the transaction. Prior to that time, Management may determine that there are intangible assets acquired in the transaction, separate and apart from goodwill. To the extent that such intangibles, if any, have definite useful lives, the value assigned to them in the purchase equation will be amortized into income over those useful lives. Although the amount allocated to such intangibles, if any, will not be known until after the closing of the transaction, Management does not believe that any such value, or the related amortization expense, would have a material effect on the unaudited Pro Forma Consolidated Financial Statements presented.

EnCana Corporation

Management's Discussion and Analysis
March 31, 2002

SPECIAL NOTE REGARDING FORWARD-LOOKING INFORMATION

In the interest of providing EnCana Corporation, formerly PanCanadian Energy Corporation ("EnCana" or the "Company") shareholders and potential investors with information regarding the Company, certain statements throughout this Interim Management Discussion and Analysis (the "MD&A") constitutes forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995. Forward-looking statements are typically identified by words such as "anticipate," "believe," "expect," "plan," "intend," or similar words suggesting future outcomes or statements regarding an outlook. Forward-looking statements in this MD&A include, but are not limited to, statements with respect to: the Company's operating costs, the Company's seismic and drilling plans, oil and gas prices, per unit netbacks, the Company's oil, liquids and gas sales, the Company's cash flow from operations and net earnings, the Company's production levels, development plans with respect to the Company's Deep Panuke and Buzzard projects, the impact of hedges on the Company's revenue, capital investment levels, the sources of funding for capital investments, the successful integration of the Company's personnel and businesses with those of Alberta Energy Company Ltd. ("AEC") and the timing thereof, and future operating results and various components thereof.

Readers are cautioned not to place undue reliance on forward-looking information, as there can be no assurance that the plans, intentions or expectations upon which it is based will occur. By its nature, forward-looking information involves numerous assumptions, known and unknown risks and uncertainties, both general and specific, that contribute to the possibility that the predictions, forecasts, projections and other forward-looking statements will not occur. Although the Company believes that the expectations represented by such forward-looking statements are reasonable, there can be no assurance that such expectations will prove to be correct. Some of the risks and other factors which could cause results to differ materially from those expressed in the forward-looking statements contained in this MD&A include, but are not limited to: volatility of crude oil and natural gas prices, fluctuations in currency and interest rates, product supply and demand, market competition, risks inherent in the Company's North American and foreign oil and gas and midstream operations, risks inherent in the Company's marketing operations, imprecision of reserves estimates, the Company's ability to replace and expand oil and gas reserves, the Company's ability to either generate sufficient cash flow from operations to meet its current and future obligations or obtain external sources of debt and equity capital, general economic and business conditions, the Company's ability to enter into or renew leases, the timing and costs of well construction, the Company's ability to make capital investments and the amounts of capital investments, imprecision in estimating the timing, costs and levels of production and drilling, the results of exploration, development and drilling, imprecision in estimates of future production capacity, the Company's ability to secure adequate product transportation, uncertainty in the amounts and timing of royalty payments, imprecision in estimates of product sales, changes in environmental and other regulations, political and economic conditions in the countries in which the Company operates, and such other risks and uncertainties described from time to time in the Company's reports and filings with the Canadian securities authorities and the United States Securities and Exchange Commission (the "SEC"). Accordingly, the Company cautions that events or circumstances could cause actual results to differ materially from those predicted. Statements relating to "reserves" or "resources" are deemed to be forward-looking statements, as they involve the implied assessment, based on certain estimates and assumptions, that the resources and reserves described can be profitably produced in the future. Readers are cautioned that the foregoing list of important factors is not exhaustive. Readers are further cautioned not to place undue reliance on forward-looking statements contained in this MD&A, which is as of the date hereof, and the Company undertakes no obligation to update publicly or revise any forward-looking information, whether as a result of new information, future events or otherwise. The forward-looking statements contained in this MD&A are expressly qualified by this cautionary statement.

ENCANA CORPORATION
(formerly PANCANADIAN ENERGY CORPORATION)
MANAGEMENT'S DISCUSSION AND ANALYSIS

This Management's Discussion and Analysis ("MD&A") for EnCana Corporation, formerly PanCanadian Energy Corporation, ("PanCanadian" or the "Company"), should be read in conjunction with the unaudited interim consolidated financial statements for the three months ended March 31, 2002 and March 31, 2001 and the audited consolidated financial statements and MD&A for the year ended December 31, 2001.

CONSOLIDATED OVERVIEW

In the three months ended March 31, 2002, net income was \$133 million, or 52 cents per common share, down from \$463 million, or \$1.81 per common share, in the same period of 2001. Cash flow of \$389 million, or \$1.52 per common share, compared with \$738 million, or \$2.89 per common share, in the first quarter of 2001. Weaker market prices for natural gas and crude oil were only partially offset by higher natural gas production and a decline in the pricing differential between lighter and heavier crude oils.

The Company's financial position remained strong. Cash flow in the quarter provided a significant portion of the funding for investing activities of \$527 million. At March 31, 2002, debt amounted to \$2,288 million and represented 36 percent of debt plus equity. Cash on hand was \$519 million and net debt to trailing 12-month cash flow was 90 percent.

During the first quarter of 2002, the Company adopted, on a retroactive basis, the amended Canadian standard on accounting for foreign currency translation. The amendment eliminates the deferral and amortization of foreign exchange gains or losses on long-term monetary items. As a result, there was an increase in reported net income of \$8 million in the first quarter of 2002 and a decrease of \$31 million in the same quarter last year.

Early in April 2002, PanCanadian and Alberta Energy Company (AEC) combined their two companies – creating EnCana Corporation. The companies satisfied all closing conditions, including receiving approvals on April 4 from shareholders of PanCanadian and shareholders and option holders of AEC and on April 5 from The Court of Queen's Bench of Alberta. PanCanadian shareholders also approved renaming of the Company to EnCana Corporation. The merger of equals was effected through the exchange of 1.472 PanCanadian (EnCana after the name change) shares for each AEC share. EnCana shares started trading on the Toronto and New York stock exchanges on April 8 under the symbol ECA.

On April 24, 2002, the Company adopted formal plans to dispose of the Houston-based merchant energy operation, which is included in the Marketing and Midstream segment. Exit alternatives are being evaluated to maximize the value of the disposition. Accordingly, these operations have been accounted for as discontinued operations and the financial statements have been restated as described in Note 3 to the Consolidated Financial Statements.

BUSINESS ENVIRONMENT

	<i>Three Months Ended</i>	
	<i>March 31</i>	
	2002	2001
Average AECO Price (<i>\$ per thousand cubic feet</i>)	3.49	11.37
Average NYMEX Price (<i>US\$ per million British thermal unit</i>)	2.32	7.09
Average WTI (<i>US\$ per barrel</i>)	21.63	28.67
WTI Bow River Differential (<i>US\$ per barrel</i>)	5.22	11.87
US/Canadian dollar exchange rate (<i>US\$</i>)	0.627	0.654

High natural gas storage levels continued to have a dampening effect on natural gas prices. Evidence that demand is benefiting from a milder and briefer than expected economic recession, coupled with the prospects of limited new supply due to reduced drilling activity in the U.S., was of little benefit to prices. The AECO index price averaged \$3.49 per thousand cubic feet in the first quarter of 2002, compared with \$3.44 per thousand cubic feet in the fourth quarter of 2001 and \$11.37 per thousand cubic feet in the first quarter of 2001.

Averaging US\$21.63 per barrel in the first quarter of 2002, the West Texas Intermediate (WTI) crude oil price was up five percent from an average of US\$20.53 per barrel in the fourth quarter of 2001. Prospects for stronger than expected demand growth, co-ordinated cutbacks in OPEC production and an uncertain situation in Iraq and the Middle East combined to build support for firmer crude oil prices. However, the WTI price remained below its average of US\$28.67 per barrel in the first quarter of 2001.

There was a significant narrowing in the differential between heavier and lighter crude oil prices as the supply/demand balance for heavy oil improved. The WTI-Bow River differential averaged US\$5.22 per barrel in the first three months of 2002, compared with US\$9.52 per barrel and US\$11.87 per barrel in the last and first quarters of 2001, respectively. Market fundamentals for heavy oil are expected to further benefit from the scheduled resumption in the second quarter of operations at the CITGO refinery in Illinois, which was closed for several months after it suffered a fire, and from the approaching start of the summer asphalt season.

RESULTS OF OPERATIONS

Upstream

<i>Financial Results (\$ millions)</i>	<i>Three Months Ended March 31</i>							
	<i>2002</i>				<i>2001</i>			
	<i>Natural gas</i>	<i>Crude oil</i>	<i>Field NGL & other</i>	<i>Total</i>	<i>Natural gas</i>	<i>Crude oil</i>	<i>Field NGL & other</i>	<i>Total</i>

Depletion, depreciation and amortization	-	-	-	206	-	-	-	170
Upstream income	\$ 252	\$ 147	\$ 29	\$ 200	\$ 705	\$ 160	\$ 45	\$ 720
Capital expenditures (excludes net acquisitions / dispositions)				\$ 478				\$ 351

* Direct operating expenses for field NGL are commingled with natural gas expenses.

Revenue Variances for 2002 Compared to 2001 (\$ millions)

	<i>Three Months Ended March 31</i>		
	<i>Price</i>	<i>Volume</i>	<i>Total</i>
Natural gas	\$ (520)	\$ 44	\$ (476)
Crude oil	(10)	(4)	(14)
Field NGL and other	(26)	9	(17)
Total production revenue	\$ (556)	\$ 49	\$ (507)

In the first quarter of 2002, Upstream production revenues of \$600 million were down \$507 million, or 46 percent, from the same quarter of 2001.

The Company's realized natural gas price was \$3.44 per thousand cubic feet, a decrease of 61 percent from \$8.76 per thousand cubic feet in the first three months of 2001. Hedging activities resulted in a gain of \$29 million, or 30 cents per thousand cubic feet, versus a cost of \$113 million, or \$1.22 per thousand cubic feet, in first quarter of 2001. There was a five-percent increase in average daily natural gas production to 1,085 million cubic feet due chiefly to a successful drilling program.

Compared with the first quarter of 2001, a decline in market prices for lighter crude oils was largely offset by a narrowing in the differential between heavier and premium-priced lighter crude oils. The realized price on the Company's mix of crude oil products of \$25.55 per barrel in the first quarter of 2002 was down just four percent, while the benchmark WTI crude oil price declined 25 percent. Hedging activities had unfavourable effects of \$8 million, or 82 cents per barrel, in the first quarter of 2002 and \$11 million, or \$1.14 per barrel, in the same quarter of 2001. Production of crude oil was down two percent, averaging 102,000 barrels per day in the first quarter of 2002. The decline reflects the sale of non-core, crude oil producing properties, as well as the Company's focus on growing its natural gas business.

Excluding the impact of commodity and currency hedging, royalties and similar payments were approximately 12 percent of revenues, compared with eight percent in the first quarter of 2001. The higher rate in 2002 reflected an under-accrual of freehold mineral taxes at year-end 2001.

<i>Unit Direct Operating Expenses (\$ per unit)</i>	<i>Three Months Ended</i>	
	<i>March 31</i>	
	<i>2002</i>	<i>2001</i>
Natural gas and field liquids (<i>per thousand cubic feet</i>) *	\$ 0.50	\$ 0.42
Crude oil (<i>per barrel</i>)	6.60	7.75
Per barrel of oil equivalent**	4.24	4.41

* Field liquids converted to natural gas at 1 barrel = 6 thousand cubic feet.

**Natural gas converted to barrel of oil equivalent at 6 thousand cubic feet = 1 barrel of oil equivalent.

Direct operating expenses in the Upstream division amounted to \$104 million in the first quarter of 2002, compared with \$103 million in the corresponding quarter of 2001. For natural gas and field liquids, unit operating costs on working interest production rose eight cents to 50 cents per thousand cubic feet equivalent as higher processing and maintenance costs more than offset the benefit of lower electricity charges. Costs associated with working interest production of crude oil decreased \$1.15 to \$6.60 per barrel. The improvement in unit operating expenses for crude oil was due chiefly to lower electricity costs.

Administrative expenses in the Upstream division were \$22 million in the first quarter of 2002, up \$2 million from the same period last year. On a barrel of oil equivalent basis, administrative expenses were 82 cents, or up six percent.

Depletion, depreciation and amortization charges amounted to \$206 million and compared with \$170 million in the first quarter last year. On a barrel of oil equivalent basis, depletion, depreciation and amortization expenses were up 17 percent to \$7.69 per barrel due to higher levels of capital spending.

Capital expenditures in the Upstream division were \$478 million, up \$127 million from the first quarter of 2001. The majority, approximately 72 percent, of this investment in 2002 was directed towards natural gas and crude oil exploration and development in the Western Basin. Approximately 28 percent was targeted to high impact exploration and other activities internationally and offshore the East Coast of Canada. The Company drilled 571 wells in the first quarter of 2002, 92 percent of which were successful.

Financial Results (\$ millions)	<i>Three Months Ended</i> <i>March 31</i>	
	2002	2001

	1,061	1,759
Direct expenses		
Marketing*	953	1,616
Midstream	61	102
	1,014	1,718
Margin	47	41
Administrative	9	5
Depreciation and amortization	8	5
Marketing and Midstream income	\$ 30	\$ 31
Capital expenditures (excludes net acquisitions / dispositions)	\$ 4	\$ 26

* Marketing and Midstream segment results for the first quarter of 2002 include inter-segment sales of \$541 million (2001 - \$1,115 million), as disclosed in Note 2 to the unaudited financial statements.

Marketing and Midstream

Marketing

Marketed Volumes*	<i>Three Months Ended</i> <i>March 31</i>	
	2002	2001
Natural gas (million cubic feet per day)	1,347	1,158
Crude oil (thousand barrels per day)	194	167
Natural gas liquids (thousand barrels per day)	70	62
Electricity (thousand megawatt hours)	137	-
Total (thousand MMBTUs per day)**	2,936	2,532

* Included in the marketed volume totals are amounts related to PanCanadian production.

** Conversion assumed at: 1 million cubic feet = 1 thousand MMBTU; 1 thousand barrels = 6 thousand MMBTU; 1 thousand megawatt hours = 10 thousand MMBTU.

Marketing revenues were down 41 percent to \$976 million from \$1,644 million in the first three months of 2001. The Marketing margin declined to \$23 million from \$28 million. Lower natural gas prices were the main factor underlying the decline. The margin increased to 2.4 from 1.7 percent of revenues even with lower volatility than in the prior year.

Midstream

Midstream Production	<i>Three Months Ended March 31</i>	
	2002	2001
Natural gas liquids (thousand barrels per day)	34	25

Midstream Electricity Megawatt Capacity (as at March 31, 2002)	<i>Megawatt Capacity</i>	<i>Ownership (%)</i>	<i>PanCanadian Megawatt Capacity</i>
Kingston	108	25	27
Cavalier	85	100	85
Balzac	85	50	43
			155

Midstream revenues were down \$30 million, or 26 percent, to \$85 million in the three months ended March 31, 2002. However, the associated margin nearly doubled, increasing to \$24 million from \$13 million in the same quarter of 2001. Natural gas liquids (NGL) production improved 36 percent to 34,000 barrels per day. During the first quarter of last year, the Company reduced production of extracted NGL in order to realize incremental value through the sale of natural gas, which would have otherwise been consumed in the production process. In the first quarter of 2002, product prices declined from the same period last year; however, significantly lower input costs of natural gas more than offset the price decline and the midstream margin improved substantially.

In the first quarter of 2002, Midstream revenue included approximately \$7 million from the two new 106-megawatt electricity generation plants. The Midstream unit commenced operations of the Cavalier plant at 80 percent of capacity in the third quarter of 2001 and the Balzac plant, which is 50 percent owned by PanCanadian, commenced operations in December 2001 at 80 percent of capacity.

Marketing and Midstream administrative expenses were \$9 million in the first quarter of 2002, up from \$5 million in the corresponding quarter of 2001. The increase principally reflected higher staffing levels that stemmed from an expanded Marketing and Midstream asset and activity base.

Depreciation and amortization expenses in Marketing and Midstream increased to \$8 million from \$5 million in the first quarter of 2001 largely because of the depreciation charges on the two new electricity generation plants.

Compared with the first quarter of 2001, capital expenditures decreased \$22 million to \$4 million due mainly to the completion of construction on the two new electricity generation plants.

Corporate

The Company's foreign exchange position contributed revenue of \$10 million in the first quarter of 2002, which contrasted with a charge of \$24 million in 2001. In the first quarter of 2002, the

Company adopted, on a retroactive basis, the amended Canadian standard on accounting for foreign currency translation. This amendment eliminates the deferral and amortization of foreign exchange gains or losses on long-term monetary items. The effect of the change is disclosed in Note 1 to the unaudited consolidated financial statements.

Corporate administrative expenses in the first quarter of 2002 included a one-time benefit of \$5 million. The benefit stemmed from an over-accrual in 2001 of charges associated with the reorganization of Canadian Pacific Limited.

Compared to the first quarter last year, interest expense was up \$12 million to \$32 million, principally reflecting a higher borrowing level.

The provision for income taxes decreased \$189 million to \$82 million in the first quarter of 2002 because of the lower operating income. The effective tax rate was 38 percent, unchanged from the first quarter of 2001.

LIQUIDITY, CAPITAL RESOURCES AND RISK MANAGEMENT

Cash flow from continuing operations of \$387 million in the first three months of 2002 decreased from \$712 million in the same period of 2001. The decline stemmed chiefly from weaker market prices. In addition, cash from operating activities was adversely affected by changes in non-cash working capital, which used \$243 million in the first quarter of 2002 compared with a source of \$142 million in 2001. The variance in working capital changes principally reflected the timing of payments for current income taxes.

The Company's net investing activities in the first quarter of 2002 were up \$223 million to \$527 million, including Upstream capital spending of \$478 million and Marketing and Midstream expenditures of \$4 million. Acquisition and disposition activities resulted in net proceeds of \$3 million in the first quarter of 2002 and \$152 million in the same period of 2001 when dispositions included the sale of the Pelican Lake property.

In the first quarter of 2002, \$80 million, or US\$50 million, of medium term notes matured and were retired. The consolidated debt position, including the current portion, was \$2,288 million at March 31, 2002 compared with \$2,370 million at December 31, 2001. Debt to debt plus equity was 36 percent, essentially unchanged from 37 percent at year-end 2001. At the end of the first quarter, interest coverage on a trailing 12-month basis was 24.5 times, cash on hand was \$519 million and net debt to trailing 12-month cash flow was 90 percent.

The Company's financial strength and flexibility is supplemented by a \$1.1 billion syndicated credit facility, other bank facilities of \$550 million and a \$300 million commercial paper program. PanCanadian has US\$650 million available under its US\$1.5 billion shelf prospectus that was established in the fourth quarter of 2001 for a two-year term. During the third quarter of 2001, the Company renewed a \$1 billion Canadian medium-term note shelf for a two-year term. At March 31, 2002, no issuances were outstanding and the total authorized amounts were available for use.

Risk management assets and liabilities recorded on the balance sheet result from the application of mark-to-market accounting for the physical and financial derivative positions in the marketing business, representing primarily current year values. These assets and liabilities are

managed strictly in accordance with the Company's prescribed risk limits, and all transactions are executed in accordance with the approved processes and controls set out in the risk management and credit policies. There were no new significant credit provisions taken in 2001 or 2002.

OUTLOOK

The outlook that follows excludes the effect of the merger of PanCanadian and AEC completed early in April 2002.

The Company expects to post a solid performance in 2002. Its growing production should benefit from firming energy prices as the North American economy recovers.

As of March 31, 2002, PanCanadian had the following hedges in place:

- approximately 205 million cubic feet per day of natural gas at an average AECO equivalent of \$5.97 per thousand cubic feet from April 1, 2002 to October 31, 2002; and
- 10,000 barrels per day of crude oil sold forward for the period April 2002 to June 2002 at an average WTI price of US\$23.57.

EnCana Corporation (formerly PanCanadian Energy Corporation)
SELECTED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
Three months ended March 31, 2002 (unaudited)

The interim consolidated financial statements include the accounts of EnCana Corporation (formerly PanCanadian Energy Corporation) and its subsidiaries (the "Company"), and are presented in accordance with Canadian generally accepted accounting principles. The interim consolidated financial statements have been prepared following the same accounting policies and methods of computation as the consolidated financial statements for the year ended December 31, 2001, except as described below. The disclosures provided below are incremental to those included with the annual audited consolidated financial statements. The interim consolidated financial statements should be read in conjunction with the annual audited consolidated financial statements and the notes thereto for the year ended December 31, 2001.

Note 1. *Changes in Accounting Policies*

Foreign Currency Translation

Effective January 1, 2002, the Company retroactively adopted amendments to the Canadian accounting standard for foreign currency translation. As a result of the amendments, all exchange gains and losses on long-term monetary items, that do not qualify for hedge accounting, are recorded in earnings as they arise. Previously, these exchange gains or losses were deferred and amortized over the remaining life of the monetary item. Prior periods have been restated for the change in accounting policy. The change results in an increase to net income of \$8 million for 2002 (2001 – decrease of \$31 million). The effect of this change on the December 31, 2001 consolidated balance sheet is an increase in long-term debt and a reduction in deferred credits of \$92 million, as well as a reduction in deferred charges and retained income of \$59 million.

Income before income taxes	55	35	(34)
Income taxes	22	13	(14)
Net income from discontinued operations	\$ 33	\$ 22	\$ (20)

* Upon review of additional information related to 2001 sales and purchases of natural gas by the US marketing subsidiary, the Company has determined certain revenue and expenses should have been reflected in the financial statements on a net basis rather than included on a gross basis as Revenue and Expenses-Direct. The amendment had no effect on net income or cash flow but Revenues and Expenses-Direct have been reduced by \$1,126 million.

<i>Consolidated Balance Sheet(\$ millions)</i>	2001	2000

Balance at January 1, 2002	254,939,851	\$ 196
Issued under stock option plan	750,036	18
Balance at March 31, 2002	255,689,887	\$ 214

The Company has a stock-based compensation plan (PanCanadian plan) that allows certain key employees to purchase common shares of the Company. Option exercise prices approximate the market price for the common shares on the date the options are issued. Options granted under the plan are generally fully exercisable after three years and expire five years after the grant date. Options granted under previous plans expire 10 years from the date the options were granted. As a result of the transaction as described in Note 5, all options outstanding under the PanCanadian plan became exercisable after the close of business on April 5, 2002.

As part of the Canadian Pacific Limited (CPL) reorganization in 2001, CPL stock options were replaced with stock options granted by the Company (CPL replacement plan) in a manner that was consistent with the provisions of the CPL stock option plan. Under CPL's stock option plan, options were granted to certain key employees to purchase common shares of CPL at a price not less than the market value of the shares at the grant date. The options expire 10 years after the grant date and, as a result of the reorganization are all fully vested and exercisable.

<i>Continuity of stock options</i>	<i>Number of Options</i>	<i>Weighted Average Exercise Price</i>
Outstanding at January 1, 2002	10,511,178	\$ 32.31
Granted under PanCanadian plan	31,000	43.69
Exercised	(750,036)	24.26
Cancelled	(71,650)	29.81
Outstanding at March 31, 2002	9,720,492	\$ 33.00
Exercisable at March 31, 2002	2,692,150	\$ 22.39

The Company accounts for its stock-based compensation plans using the intrinsic-value method. Under the intrinsic-value method, compensation costs are not recognized in the financial statements for share options granted to employees and directors when issued at market value.

Effective January 1, 2002, Canadian accounting standards require disclosure of the impact on net income of using the fair value method for stock options issued on or after January 1, 2002. If the fair-value method had been used, the effect on the Company's 2002 net income and net income per share would have been immaterial based on the number of stock options granted in this period.

Information with respect to crude oil, currency, and interest rate hedge contracts at December 31, 2001, is disclosed in Note 17 to the annual audited consolidated financial statements. No new material hedging contracts have been entered into subsequent to this disclosure.

Note 6. Subsequent Event

On January 27, 2002, PanCanadian and Alberta Energy Company Ltd. ("AEC") announced plans to combine their companies. The transaction was accomplished through a plan of arrangement (the "Arrangement") under the *Business Corporations Act* (Alberta). The Arrangement included a common share exchange, pursuant to which holders of common shares of AEC received 1.472 common shares of PanCanadian for each common share of AEC that they held. After obtaining approvals of the common shareholders of PanCanadian and of the common shareholders and optionholders of AEC, the Court of Queen's Bench of Alberta and appropriate regulatory and other authorities, the transaction closed April 5, 2002, and PanCanadian changed its name to EnCana Corporation ("EnCana"). On completion of the transaction, former PanCanadian shareholders own approximately 54% and former AEC shareholders own approximately 46% of EnCana.

Note 7. Reclassification

Certain information provided for prior periods has been reclassified to conform to the presentation adopted in 2002.

Alberta Energy Company Ltd.

Management's Discussion and Analysis
March 31, 2002

Management's Discussion and Analysis of Financial Condition

SPECIAL NOTE REGARDING FORWARD-LOOKING INFORMATION

In the interest of providing Alberta Energy Company Ltd. ("AEC" or the "Company") shareholders and potential investors with information regarding the Company, certain statements throughout this Management's Discussion and Analysis (the "MD&A") contains certain forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995. Forward-looking statements are typically identified by words such as "anticipate," "believe," "expect," "plan," "intend," or similar words suggesting future outcomes or statements regarding an outlook. Forward-looking statements in this MD&A include, but are not limited to, statements with respect to: the Company's operating costs, the Company's seismic and drilling plans, oil and gas prices, per unit netbacks, the Company's oil, liquids and gas sales, the Company's cash flow from operations and net earnings, the Company's production levels, the Company's share of Syncrude production, development plans with respect to the Company's Foster Creek SAGD commercial project, the timing of the closing of the sale of the Company's Colombian assets, the impact of hedges on the Company's revenue in a low price environment, capital investment levels, the sources of funding for capital investments, the successful integration of the Company's personnel and businesses with those of PanCanadian Energy Corporation ("PanCanadian") and the timing thereof, and future operating results and various components thereof.

Readers are cautioned not to place undue reliance on forward-looking information, as there can be no assurance that the plans, intentions or expectations upon which it is based will occur. By its nature, forward-looking information involves numerous assumptions, known and unknown risks and uncertainties, both general and specific, that contribute to the possibility that the predictions, forecasts, projections and other forward-looking statements will not occur. Although AEC believes that the expectations represented by such forward-looking statements are reasonable, there can be no assurance that such expectations will prove to be correct. Some of the risks and other factors which could cause results to differ materially from those expressed in the forward-looking statements contained in this MD&A include, but are not limited to: volatility of crude oil and natural gas prices, fluctuations in currency and interest rates, product supply and demand, market competition, risks inherent in the Company's North American and foreign oil and gas and midstream operations, risks inherent in the Company's marketing operations, imprecision of reserves estimates, the Company's ability to replace and expand oil and gas reserves, the Company's ability to either generate sufficient cash flow from operations to meet its current and future obligations or obtain external sources of debt and equity capital, general economic and business conditions, the Company's ability to enter into or renew leases, the timing and costs of well and pipeline construction, the Company's ability to make capital investments and the amounts of capital investments, imprecision in estimating the timing, costs and levels of production and drilling, the results of exploration, development and drilling, imprecision in estimates of future production capacity, the Company's ability to secure adequate product transportation, uncertainty in the amounts and timing of royalty payments, imprecision in estimates of product sales, changes in environmental and other regulations, political and economic conditions in the countries in which the Company operates including Ecuador, and such other risks and uncertainties described from time to time in the Company's reports and filings with the Canadian securities authorities and the United States Securities and Exchange Commission (the "SEC"). Accordingly, the Company cautions that events or circumstances could cause actual results to differ materially from those predicted. Statements relating to "reserves" or "resources" are deemed to be forward-looking statements, as they involve the implied assessment, based on certain estimates and assumptions, that the resources and reserves described can be profitably produced in the future. Readers are cautioned that the foregoing list of important factors is not exhaustive. Readers are further cautioned not to place undue reliance on forward-looking statements contained in this MD&A, which is as of the date hereof, and the Company undertakes no obligation to update publicly or revise any forward-looking information, whether as a result of new information, future events or otherwise. The forward-looking statements contained in this MD&A are expressly qualified by this cautionary statement.

AEC Management's Discussion and Analysis

Management's discussion and analysis of the financial condition and results of operations is to be read in conjunction with the Interim Unaudited Consolidated Financial Statements at and for the three months ended March 31, 2002 and Management's Discussion and Analysis and Audited Consolidated Financial Statements at and for the year ended December 31, 2001.

SUBSEQUENT EVENT

On April 5, 2002, AEC and PanCanadian announced the completed merger of their two companies, creating EnCana Corporation ("EnCana"). The Court of Queen's Bench of Alberta approved the plan of arrangement involving AEC, one day after shareholders and optionholders of AEC and shareholders of PanCanadian voted 91% and 81%, respectively, in favor of the transaction. PanCanadian shareholders also approved changing PanCanadian's name to EnCana Corporation. Under the terms of the merger, AEC shareholders received 1.472 PanCanadian (EnCana after the name change) common shares for each AEC common share they owned.

CONSOLIDATED SUMMARY

Consolidated Net Earnings for the three months ended March 31, 2002 amounted to \$72.0 million, a 78% decrease, or \$0.37 per share, diluted ("per share") compared to \$332.6 million, or \$2.03 per share, in 2001 (2000 - \$118.8 million; \$0.79 per share).

Consolidated Cash Flow from Operations decreased 50% to \$405.8 million for the first three months of 2002, or \$2.58 per share, from \$809.3 million, or \$5.13 per share, in 2001 (2000 - \$367.2 million; \$2.56 per share). Consolidated Revenues, net of royalties and production taxes, totaled \$1,226.3 million in the first quarter of 2002, compared to \$2,088.8 million in 2001, a 41% decrease (2000 - \$1,019.0 million).

Consolidated Financial Summary		First Quarter		
(\$ million)	2002	2001	2000	
Net Earnings	72.0	332.6	118.8	
Cash Flow from Operations	405.8	809.3	367.2	
Revenues, net of royalties and production taxes	1,226.3	2,088.8	1,019.0	
Diluted per Share (\$ per share)				
Net Earnings	0.37	2.03	0.79	
Cash Flow from Operations	2.58	5.13	2.56	

Consolidated Net Revenues decreased primarily as a result of lower natural gas prices and lower Purchased Gas sales in the first quarter of 2002 compared to the same period in 2001. This decrease was partially offset by higher produced natural gas volumes sold. Cash Flow from Operations reflects lower produced gas netbacks, partially offset by lower cash Income Taxes. Net Earnings includes the impact of higher Depreciation, Depletion and Amortization as a result of the higher produced natural gas and crude oil volumes sold and lower future Income Taxes. Interest, net, increased due to higher average long term debt levels.

AEC Management's Discussion and Analysis

Contributions for the past eight quarters are as noted in the following table:

Quarterly Information

(\$ million except per share amounts)

Year Quarter	2002 Q1	2001 Q4	2001 Q3	2001 Q2	2001 Q1	2000 Q4	2000 Q3	2000 Q2
Revenues, net of royalties and production taxes	1,226.3	1,206.4	1,339.2	1,637.9	2,088.8	2,067.2	1,364.7	1,072.8

- per share diluted	2.58	1.38	2.66	3.32	5.13	6.04	3.75	2.54
Produced Gas Sales (MMcf/d)	1,639	1,432	1,395	1,241	1,221	1,301	1,099	917
Oil and NGL Sales (bbls/d)	129,985	137,125	136,140	135,910	133,118	128,863	120,220	115,922

RESULTS OF OPERATIONS: UPSTREAM

For the three months ended March 31, 2002, Upstream revenues, net of Royalties and production taxes and Transportation and selling expenses, decreased 49% or \$726.9 million, to \$756.2 million. This compares to an increase in 2001 of 105% or \$761.1 million, to \$1,483.1 million. The accompanying table shows the details of these changes by product:

Changes in Oil and Natural Gas Revenues

Factor:	2002 Compared to 2001					2001 Compared to 2000				
	Price	Price Hedge	Volume	Royalties & Other	Total	Price	Price Hedge	Volume	Royalties & Other	Total
North America										
Natural Gas and NGLs	(922.0)	10.6	359.8	134.7	(416.9)	686.3	10.9	73.3	(191.0)	579.5
Oil										
Conventional	15.3	3.4	13.9	1.0	33.6	(53.5)	-	21.4	3.3	(28.8)
Syncrude	(25.9)	2.3	(3.0)	12.1	(14.5)	6.2	-	28.1	(0.2)	34.1
Purchased Gas Sales	(60.4)	29.5	(272.8)	-	(303.7)	296.6	(108.4)	7.4	-	195.6
International	(9.4)	0.2	(28.8)	12.6	(25.4)	(62.4)	-	28.2	14.9	(19.3)
Total	(1,002.4)	46.0	69.1	160.4	(726.9)	873.2	(97.5)	158.4	(173.0)	761.1

In 2002, the \$29.5 million Price Hedge represents payments made by financial intermediaries for Purchased Gas Sales under floating to fixed price swap agreements implemented as a part of the Company's risk management strategy when, at the time of settlement, the market price exceeded the fixed price contract amount. Contemporaneously, similar quantities of gas were forward purchased under fixed price agreements, which, upon settlement, were below market prices in the amount of \$1.3 million. For 2002, this strategy resulted in a net benefit of \$15.3 million, net of transportation and selling expenses of \$15.5 million.

AEC Management's Discussion and Analysis

In 2001, the Company made \$(108.4) million in Price Hedge payments under floating to fixed price swap agreements. Related fixed price gas purchase agreements were at below market prices in the amount of \$161.6 million and resulted in a net benefit of \$11.6 million, net of transportation and selling expenses of \$41.6 million.

Product Netbacks

The following table summarizes the average net revenue received after deducting transportation, royalties, production taxes and operating costs ("Netback"), by product, for the last eight quarters:

Year	2002	2001				2000		
Quarter	Q1	Q4	Q3	Q2	Q1	Q4	Q3	Q2
Canada produced gas (\$/Mcf)	2.00	1.84	2.02	4.07	6.79	6.27	3.77	2.84
U.S. produced gas (\$/Mcf)	2.15	2.23	2.58	4.54	6.20	5.45	4.43	4.60
North America conventional oil (\$/bbl)	15.79	16.60	17.27	12.69	10.99	15.23	25.91	23.26
North America NGLs (\$/bbl)	20.03	17.12	25.35	28.28	30.04	34.44	28.39	23.55
Syncrude (\$/bbl)	17.49	26.02	15.23	18.47	18.93	20.82	21.11	18.91
Ecuador oil (\$/bbl)	9.24	13.07	13.63	13.77	12.13	14.05	18.51	15.70

- Includes hedge impact where applicable

North America Results of Operations

The first quarter North America average produced gas price realized, net of transportation and selling expense, was \$3.23/Mcf, down 65% from \$9.33/Mcf in 2001. A slowing North American economy and warmer than average winter temperatures resulted in lower demand from virtually all sectors and led to above average storage inventories contributing to the decline in natural gas prices. Natural gas liquids prices decreased 36% to \$27.49/bbl from \$42.96/bbl in 2001.

North America natural gas production increased to 1,478 MMcf/d, up 21% from the 2001 total of 1,222 MMcf/d in the first quarter. An additional 161 MMcf/d was withdrawn from inventory, bringing total produced gas sales to 1,639 MMcf/d in 2002 compared to 1,221 MMcf/d in 2001, up 34%.

Benchmark West Texas Intermediate oil prices ("WTI") averaged US\$21.64/bbl in 2002 for the first three months, compared to the 2001 average of US\$28.73/bbl. Light-heavy oil price differentials decreased, returning to more traditional levels, averaging \$7.25/bbl compared to \$17.31/bbl in 2001. During the first quarter of 2002 WTI strengthened from US\$19.73/bbl in January to US\$24.44/bbl in March in response to improving supply demand fundamentals resulting from OPEC production restraint and an improved economic outlook in North America. Similarly light heavy differentials narrowed over the first quarter from \$9.05/bbl in January to \$5.73/bbl in March. This combination has resulted in significantly improved heavy oil prices.

Total North America liquids sales increased 12% to 91,211 bbls/d in the first three months of 2002 compared to 81,536 bbls/d in 2001, primarily as a result of increased conventional crude production in Canada from the Company's SAGD project at Foster Creek.

During the first quarter of 2002, net capital of \$661.6 million was invested in North America upstream activities, of which \$532.4 million was directed to Canadian operations and \$129.2 million to the U.S. operations.

AEC Management's Discussion and Analysis

Western Canada

Natural gas prices in Canada averaged \$3.20/Mcf, net of transportation and selling expense, in the first three months, down 66% from \$9.37/Mcf in 2001 (2000 - \$3.00/Mcf). Natural gas production increased 14% to 1,185 MMcf/d from 1,044 Mmcf/d in 2001 due to production from the Ladyfern area and increases in the Greater Sierra area in northeast British Columbia (2000 - 930 MMcf/d). Sales of produced natural gas, which includes the impact of gas injections and withdrawals from gas storage, increased to 1,346 MMcf/d, up 29% from 1,043 MMcf/d in the same period of 2001 (2000 - 965 MMcf/d).

Prices for Canadian conventional crude oil averaged \$22.81/bbl, net of transportation and selling expense, and including the impact of price hedges, a 22% increase from the \$18.75/bbl averaged in the first three months of 2001 (2000 - \$32.41/bbl). This increase was principally as a result of the decrease in light-heavy oil price differentials and the benefit from crude oil hedges which offset a decrease in the WTI average price in the quarter. Prices for Syncrude oil, net of transportation and selling expense and including the impact of price hedges, averaged \$34.86/bbl compared to \$43.17/bbl in 2001, a 19% decrease compared to the 25% decrease in the WTI benchmark price (2000 - \$40.97/bbl). Natural gas liquids prices in Canada decreased to \$24.05/bbl from \$43.11/bbl in 2001 (2000 - \$34.11/bbl).

In the first three months of 2002, the Company produced an average of 51,104 bbls/d of conventional oil in Canada, compared to 42,856 bbls/d produced in 2001, an increase of 19% (2000 - 35,372 bbls/d) primarily as a result of increases from the Foster Creek SAGD project. AEC Syncrude sales averaged 31,548 bbls/d, a decrease of 2% from the 32,319 bbls/d sold in 2001 (2000 - 24,497 bbls/d). Natural gas liquids volumes in Canada increased to 5,406 bbls/d year to date, from 4,805 bbls/d in 2001 (2000 - 4,808 bbls/d).

Operating costs in Canada increased to \$143.6 million for the first three months of 2002, compared to \$135.2 million in 2001 (2000 - \$99.7 million). Higher production volumes resulted in the increase, partially offset by lower natural gas fuel costs at Syncrude.

Year to date sales of purchased gas decreased to 242 MMcf/d in 2002 from 690 MMcf/d in 2001, (2000 - 878 MMcf/d). Revenue from the sale of purchased gas, net of transportation and selling expense, amounted to \$116.1 million, down from \$419.8 million in 2001 as a result of lower volumes sold and lower average unit sales prices (2000 - \$224.3 million). At March 31, 2002, the Company had contracts in place to purchase 84.8 Bcf of natural gas over an eighteen month period. Contracts were also in place to deliver 69.2 Bcf during the same time frame.

Capital investment focused on exploration and development activities in the Greater Sierra and Ladyfern areas in northeast British Columbia, and further development at Suffield, Caribou and Pelican Lake.

U.S. Rockies

Year to date, U.S. natural gas prices, net of transportation and selling expense, averaged \$3.35/Mcf compared to \$9.04/Mcf in 2001 which included \$0.73/Mcf related to a mark to market adjustment on acquired fixed priced contracts. Natural gas sales increased to 293 MMcf/d from 178 MMcf/d in 2001, reflecting successful ongoing drilling programs, capacity expansion and the addition of production from Mamm Creek. Natural gas liquids volumes increased to 3,153 bbls/d at an average price of \$33.38/bbl, up from 1,556 bbls/d at \$42.51/bbl in 2001.

Operating costs in the U.S. Rockies increased to \$7.8 million for the first three months of 2002, compared to \$5.7 million in 2001. Higher production volumes and the addition of Mamm Creek contributed to the increase.

AEC Management's Discussion and Analysis

Capital investment in the U.S. Rockies amounted to \$129.2 million, year to date, relating to continuing exploration and development of the Jonah and Mamm Creek fields and the acquisition and evaluation of exploratory lands.

Ecuador Results of Operations

Production from Ecuador averaged 50,351 bbls/d in the first quarter of 2002, down 7%, compared to 53,894 bbls/d in 2001, (2000 - 41,703 bbls/d). Sales of crude from Ecuador declined to 38,774 bbls/d from 51,512 bbls/d in 2001 primarily as a result of the timing of tanker shipments leaving port.

Ecuador sales volumes remain constrained by available pipeline transportation which is allocated among shippers based upon the shippers' productive capacity and the quality of crude oil. The completion of the OCP pipeline will remove current transportation constraints.

The Ecuador oil price, net of transportation costs, declined in the first quarter of 2002 to an average of \$22.07/bbl, including the impact of allocated price hedges, compared to \$24.71/bbl in 2001 as a result of a lower WTI price partially offset by narrower light to heavy differentials and allocated price hedges (2000 - \$37.97/bbl). Operating costs in Ecuador increased from \$4.53/bbl in the first quarter of 2001 to \$5.78/bbl due to lower sales volumes and higher personnel costs.

Capital investments in Ecuador amounted to \$132.6 million in the first three months compared to \$81.0 million in 2001 and related to continuing exploration and development operations on the Tarapoa Block and Block 15 in preparation for substantially increasing production when the OCP pipeline is completed in 2003.

New Ventures Exploration

Investments in New Ventures Exploration amounted to \$22.8 million in the first three months of 2002 compared to \$47.3 million in 2001. The Company has ongoing exploration in the Gulf of Mexico, Mackenzie Delta, Alaska, the northwest shelf of Australia and offshore Azerbaijan. During the first quarter the Company participated in exploration wells in Australia and the Gulf of Mexico, neither of which yielded commercial quantities of crude oil and both of which were abandoned. The Company is assessing further drilling in each of these areas.

During the first quarter of 2002, the Company has also entered into exploration commitments in Bahrain, Qatar, and Chad, totaling \$140 million over three years.

RESULTS OF OPERATIONS: MIDSTREAM

Midstream revenues decreased 28% to \$391.1 million year to date 2002, compared to \$542.5 million in 2001 (2000 - \$253.3 million), primarily due to the impact of lower natural gas prices on sales related to the Gas storage facility optimization program. Operating Cash Flow decreased 52% from \$104.1 million year to date 2001 to \$49.9 million in 2002, as a result of lower optimization margins realized and to pipeline dispositions in late 2001.

Midstream Capital

Capital investment in Midstream amounted to \$10.7 million in the first three months of 2002, primarily related to ongoing improvements to pipelines facilities.

Construction of the 450,000 bbls/d OCP pipeline in Ecuador continues with completion targeted for the second quarter of 2003. To date, \$26.5 million has been invested related to the Company's 31.4% equity interest.

LIQUIDITY AND CAPITAL RESOURCES

Consolidated Cash Flow from Operations totaled \$405.8 million in the first quarter of 2002, (2001 - \$809.3 million), of which \$386.3 million, or 95% of the total, originated in the Upstream division (2001 - \$746.9 million) and \$19.5 million, was provided by the Midstream division (2001 - \$62.4 million). Produced natural gas and natural gas liquids sales provided \$256.8 million or 63% of the consolidated total (2001 - \$607.8 million), and crude oil added \$117.0 million or 29% (2001 - \$137.2 million), including allocated corporate costs.

Consolidated cash capital investment totaled \$714.5 million in 2002, year to date, in existing core areas (2001 - \$963.5 million). An additional \$100.8 million cash was invested in corporate and property acquisitions (2001 - \$482.8 million), while non-core property dispositions amounted to \$35.7 million (2001 - \$24.5 million). Total cash net capital investment of \$815.3 million exceeded Cash Flow from Operations by \$373.8 million. The Company utilized long-term debt to fund the difference.

On a consolidated basis, long-term debt held by the Company, which excludes project financing debt related to the Express System, was \$4,290.6 million at March 31, 2002, up \$632.6 million from the December 31, 2001 amount of \$3,658.0 million. Total long-term debt, including the project financing debt of \$580.5 million, is \$4,871.1 million (2001 - \$4,242.1 million). The Company's unutilized bank credit facilities total \$1.6 billion.

Under its Normal Course Issuer Bid, AEC purchased approximately 431,400 shares, for \$24.4 million, at an average price of \$56.63 in the first quarter of 2002.

Also in the first quarter, the Company declared and paid a special Common Share dividend of forty five (\$0.45) cents per Common Share.

RISK MANAGEMENT

The Company's results are influenced by factors such as product prices, interest and foreign exchange rates, royalties, taxes, operations, and credit risk.

The Company has entered into various commodity pricing agreements as a means of managing price volatility. In the first quarter the Company sold forward an additional 400 MMcf/d of natural gas at fixed prices, bringing the total volume subject to fixed price contracts to an average of 1 Bcf/d for the period January to September, 2002. At March 31, 2002 these contracts had an unrealized mark to market loss of \$133 million in Canada and US\$27 million on the U.S. Rockies contracts.

The Company has entered into various financial instruments to manage price volatility related to its gas storage optimization program, including futures, fixed-for-floating swaps and basis swaps. On a combined basis, these instruments had a net unrealized mark to market loss of \$23.3 million partially offset by a net unrealized mark to market gain of \$21.4 million on physical inventory in storage at March 31, 2002.

Foreign exchange contracts in the amount of US\$171.2 million have been entered into to limit U.S. to Canadian exchange rate fluctuations on the Company's natural gas purchase and sale agreements. At March 31, 2002 these contracts had an unrealized mark to market loss of \$25.0 million.

An active program of monitoring and reporting day-to-day operations is designed to provide assurance that environmental and regulatory standards are met. Contingency plans are in place for timely response to an event.

OUTLOOK

AEC Management's Discussion and Analysis

The Outlook that follows excludes the impact of the merger transaction completed April 5, 2002, between AEC and PanCanadian.

The Company's sales forecast for 2002 remains at between 1.525 and 1.575 Bcf/d for produced natural gas and between 142,000 and 153,000 bbls/d of crude oil. While commodity price volatility is expected to continue throughout 2002, there are positive signs, as a result of an improving North American economy and the anticipated continuing effectiveness of crude oil supply management by the OPEC producers. The Company's program of natural gas and crude oil price hedges are expected to reduce the revenue impact of any downward trend in prices.

The Company continues to expect capital investment in core programs to be approximately \$2.1 billion before dispositions.

AEC and PanCanadian announced on April 5, 2002, all required approvals for the merger of the two companies had been received. The combined organization now operates under the name EnCana Corporation.

Interim Report

For the three months ended March 31, 2002

Alberta Energy Company Ltd.

Notes to Consolidated Financial Statements

1. Basis of Presentation

The Company organizes its operations into two business groups. Upstream includes the Company's North America and International exploration for, and production of, natural gas and crude oil. Midstream includes both the Pipelines and Processing operations and the Gas Storage operations. These interim consolidated financial statements have been prepared on the same basis as the audited consolidated financial statements as at and for the year ended December 31, 2001.

2. Change in Accounting Policy

Effective December 31, 2001, the Company adopted the new Canadian accounting standard for foreign currency translation and, as required by the standard, all prior periods have been restated. The net earnings impact of this change is included in foreign exchange and income taxes on the Consolidated Statement of Earnings.

Effective January 1, 2000, the Company adopted, retroactively without restating prior periods, the liability method of accounting for income taxes as recommended by the Canadian Institute of Chartered Accountants ("CICA"). The Company adopted the recommendations by recording additional capital assets of \$273.3 million; a decrease in retained earnings of \$341.3 million and an increase in the future income tax liability of \$614.6 million.

3. Corporate Acquisitions

On February 2, 2001, the Company acquired all of the issued and outstanding shares of Ballard Petroleum, LLC (Ballard) for net cash consideration of approximately \$328.4 million. Ballard is engaged in the exploration for, and production of, natural gas and operates a natural gas pipeline in the United States.

In February 2001, the Company acquired a 36% equity interest in Oleoducto Trasandino (Trasandino) for net cash consideration of US\$64.3 million. The Trasandino system transports crude oil from Argentina to refineries in Chile.

4. Interest, Net

	For the three months ended March 31		
	2002	2001	2000
	(\$ millions)		
Interest expense - long-term debt	73.5	63.9	38.0
Interest expense - other	4.6	3.0	1.2
Interest income	(6.3)	(2.1)	0.8
	71.8	64.8	40.0
Less: Capitalized interest	-	3.5	4.5
Interest, net	71.8	61.3	35.5

5. Income Taxes

The provision for income taxes is as follows:

	For the three months ended March 31		
	2002	2001	2000
	(\$ millions)		
Current			
Canada	24.9	104.3	2.4
United States	-	7.0	-
Ecuador	1.3	4.4	0.5
Other	-	0.4	-
	26.2	116.1	2.9
Future	15.8	134.5	46.8
Income taxes	42.0	250.6	49.7

6. Long-Term Debt

	March 31, 2002	December 31, 2001
	(\$ millions)	
Upstream		
Canadian Dollar debt	1,560.1	1,165.2
US Dollar debt (US\$1,269.9)	2,023.6	1,907.9
	3,583.7	3,073.1
Midstream		
Canadian Dollar debt	706.9	584.9
	4,290.6	3,658.0

Interim Report

For the three months ended March 31, 2002

Alberta Energy Company Ltd.

Notes to Consolidated Financial Statements

7. Project Financing Debt

The Express Pipeline System has outstanding US\$132.7 million aggregate principal amount of senior secured notes due 2013 bearing interest at 6.47% and US\$246.9 million aggregate principal amount of subordinated secured notes due 2019 bearing interest at 7.39% which are non-recourse to the Company. The notes are secured by the assignment of the accounts receivable of Express Pipeline System and a floating charge over the assets of the Canadian portion of the Express System.

8. Share Capital (millions)

	March 31, 2002		December 31, 2001	
	Number	Amount	Number	Amount
Common shares outstanding, beginning of period	147.9	\$ 3,052.3	149.9	\$ 3,077.4
Shares repurchased	(0.5)	(8.9)	(3.6)	(73.2)
Employee share option plan	0.9	29.0	1.5	45.9
Shareholder Investment Plan	-	1.4	0.1	2.2
Common shares outstanding, end of period	148.3	\$ 3,073.8	147.9	\$ 3,052.3

During the period, the Company has purchased approximately 0.5 million of its Common Shares for total consideration of \$24.4 million, resulting in a reduction of share capital of \$8.9 million and a charge to retained earnings of \$15.5 million.

The following table summarizes the information about options to purchase Common Shares:

	March 31, 2002		December 31, 2001	
	Share Options	Weighted Average Exercise Price (\$)	Share Options	Weighted Average Exercise Price (\$)
Outstanding, beginning of period	9.9	45.60	8.7	35.21
Granted	-	58.20	3.1	66.82
Exercised	(0.9)	32.61	(1.5)	29.88
Forfeited	-	49.48	(0.4)	44.76
Outstanding, end of period	9.0	46.96	9.9	45.60

The Company accounts for its stock-based compensation plans using the intrinsic-value method whereby no costs have been recognized in the financial statement for share options granted to employees and directors. As now required by Canadian Generally Accepted Accounting Principles, the impact on compensation costs of using the fair value method, whereby compensation costs had been recorded in net earnings, must be disclosed. If the fair value method had been used, the Company's net earnings and net earnings per share would approximate the following pro forma amounts:

	2002	2001	2000
Compensation Costs	7.7	6.3	5.9
Net Earnings:			
As reported	72.0	332.6	118.8
Pro forma	64.3	326.3	112.9
Net Earnings per Common Share:			
Basic			
As reported	0.38	2.15	0.81
Pro forma	0.33	2.10	0.76
Diluted			
As reported	0.37	2.03	0.79
Pro forma	0.32	1.99	0.75

The fair value of each option granted is estimated on the date of grant using the Black-Scholes option-pricing model with weighted average assumptions for grants as follows:

Risk free interest rate	3.53%	3.53%	6.02%
Expected lives (years)	4.00	4.00	4.00
Expected volatility	0.32	0.38	0.41
Dividend per share	\$ 0.60	\$ 0.60	\$ 0.40

Total	\$ 14,700.2	\$ 13,559.0	\$ 8,238.0

10. Subsequent Event

On January 27, 2002, AEC and PanCanadian Energy Corporation ("PanCanadian") announced plans to combine their companies. The transaction was accomplished through a plan of arrangement (the "Arrangement") under the *Business Corporations Act* (Alberta). The Arrangement included a common share exchange, pursuant to which holders of common shares of AEC received 1.472 common share of PanCanadian for each common share of AEC that they held. After obtaining approvals of the common shareholders and optionholders of AEC and of the common shareholders of PanCanadian, the Court of Queen's Bench of Alberta and appropriate regulatory and other authorities, the transaction closed April 5, 2002, and PanCanadian changed its name to EnCana Corporation ("EnCana"). On completion of the transaction, former AEC shareholders own approximately 46% and former PanCanadian shareholders own approximately 54% of EnCana.
